

Efficient removal of hospital pathogens from hard surfaces by a combined use of bacteriophages and probiotics: potential as sanitizing agents [Corrigendum]

D'Accolti M, Soffritti I, Piffanelli M, Bisi M, Mazzacane S, Caselli E. *Infect Drug Resist.* 2018;11:1015–1026.

Page 1018, Bacteriophages section, the text “All bacteriophages used in this study were obtained from Eliava Institute (Staphylococcal phage and Pyophage; GA, USA)” should read “All bacteriophages used in this study were obtained from Eliava Institute (Staphylococcal phage and Pyophage; Tbilisi, Georgia)”.

Publish your work in this journal

Infection and Drug Resistance is an international, peer-reviewed open-access journal that focuses on the optimal treatment of infection (bacterial, fungal and viral) and the development and institution of preventive strategies to minimize the development and spread of resistance. The journal is specifically concerned with the epidemiology of antibiotic

resistance and the mechanisms of resistance development and diffusion in both hospitals and the community. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
